

## **Year 9 Geography**

### **Geography assessment 1 revision list**

- Formation of waves and tides
- Features of constructive and destructive waves  
*(Height, wave length, steepness, impact on beach, swash and backwash)*
- Erosion processes  
*(Abrasion, attrition, solution, hydraulic action)*
- Erosion landforms  
*(Headland and bays, stacks)*
- Location, formation and key features of the Jurassic coastline.  
*(Identification of features using OS maps and ariel photographs)*
- Coastal transportation processes.  
*(Traction, saltation, suspension and solution)*
- Formation of depositional landforms (Beaches/sand dunes).  
*(Impact of constructive waves and wave refraction on beach formation)*  
*(Sand dune features and succession)*
- Examples of coastal management techniques.
- Effectiveness of hard and soft engineering strategies.
